## EDUCATION

<b>Columbia University</b> <i>Master of Science – Computer Science, Machine Learning Track</i>	Dec 2023 (expected) New York, US
<b>Korea Advanced Institute of Science and Technology (KAIST)</b> <i>Bachelor of Science – Computer Science, Specialization in Artificial Intelligence</i> <i>Minor in Electrical Engineering</i>	Feb 2022 Daejeon, Korea

## RELEVANT COURSEWORK

**Math:** Real Analysis, Linear Algebra, Probability and Statistics, Differential Equations  
**Machine Learning:** Computational Learning Theory, Statistical Learning Theory, Machine Learning, Artificial Intelligence, Computer Vision, AI Based Software Engineering, Natural Language Processing

## EXPERIENCE

<b>Columbia University</b> <i>Teaching Assistant, Computing for Business Research</i> <ul style="list-style-type: none"><li>Supported 70+ graduate students in Python, MATLAB, C, Bash, R, MySQL, TensorFlow, and Git by holding weekly office hours</li><li>Code-reviewed and provided feedback for biweekly programming assignments</li></ul>	Sept 2022 – Dec 2022 New York, US
<b>Samsung Research</b> <i>Software Engineer, Visual Perception Team</i> <ul style="list-style-type: none"><li>Integrated various cutting-edge AI research from Samsung AI centers around the world into an interactive AI recipe navigation web demo using Node.js, Flask, Svelte, and Bootstrap</li><li>Facilitated communication between AI modules and the server through MQTT and flexbuffers</li><li>Developed an ingredient detection demo that uses a projector to display detection results on a kitchen table</li><li>Both demos featured at Samsung Research Open Lab 2022</li></ul>	Jan 2022 – Jul 2022 Seoul, Korea
<b>KAIST INA Lab</b> <i>Undergraduate Researcher</i> Project: Content-Aware and Task-Aware Variable Rate Image Compression using Compressive Autoencoders <ul style="list-style-type: none"><li>Exploited content-specific redundancies by training a compressive autoencoder with a dataset consisting of only one type of content such as faces (i.e., CelebA Dataset), achieving up to 2% improvement in terms of PSNR</li><li>Optimized the compressive autoencoder for a task-specific loss instead of a perceptual loss, which outperformed JPEG in image classification up to 11% in terms of accuracy for low resolution images</li></ul>	Feb 2021 – Sep 2021 Daejeon, Korea
<b>Koh Young Technology</b> <i>Research Intern, Machine Intelligence Team</i> <ul style="list-style-type: none"><li>Implemented a prototype for a distributed, real-time SMT (surface-mount technology) inspection process using Apache Kafka, Apache Spark, and Apache HBase—which was later developed into a successful full-fledged product</li><li>Achieved up to 10x speed up from batch processing, significantly decreasing the number of defects in the solder paste printing process</li></ul>	Mar 2019 – Aug 2019 Yongin, Korea

## EXTRACURRICULAR ACTIVITIES

<b>2022 ICPC Columbia University Local Contest</b> <ul style="list-style-type: none"><li>15<sup>th</sup> out of 112 participants; solo contest</li></ul>	Sep 2022
--	----------

## TECHNICAL SKILLS

<b>Languages:</b> Python, C++, C	<b>Mobile Development:</b> Android Studio, Flutter, Unity
<b>Machine Learning:</b> PyTorch, TensorFlow	<b>Distributed Systems:</b> Apache Kafka, Apache Spark,
<b>Web Development:</b> HTML, CSS, Svelte, Flask, Bootstrap, Node.js	Apache HBase
	<b>Developer Tools:</b> Docker, GitHub
